

# RADICAL INNOVATION FOR THE NEXT GENERATION OF TRUCK WASH...

**Truck Wash  
Technologies Inc.**

## **Who We Are**

Truck Wash Technologies - the leader in providing advanced technology for complex cleaning applications. Our objective is to meet our customers' cleaning demands with our expertise by providing vehicle wash solutions never before seen in the industry.

## **Markets**

- Commercial washing applications
- Custom wash applications
  - Biosecurity
  - Metal finishing
  - Complex fleet applications

## **Services**

- Consulting (including technical feasibility)
- Design build equipment
- Project management
- Systems integration

## **Advantages**

An advanced gantry style washing system offering custom solutions tailored to a specific application. Our leading edge technologies allow our systems to be taught how to wash a vehicle, a progressive automated solution that replicates manual washing.

Best suited for complex cleaning applications, our systems excel where cleaning is an integral part of day to day operations and where harsh chemicals are used and there is a need to minimize employee exposure. There is now a viable alternative to labor.
